

Meet Patel

Antigonish, NS | (902) 322-3808 | meett.patel.2803@gmail.com | linkedin.com/in/meettpatel28

SUMMARY

Applied Computer Science graduate student with over two years of professional experience in managing incidents in microservices for enterprises and developing applications on websites for customers. Hands-on experience in working with full-stack development, deep learning, and embedded systems. Postgraduate education in machine learning, real-time computing, and computational logic. As an engineer, passionate about solving practical technical problems in a systematic manner.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: Spring Boot, FastAPI, Vue.js, React, PyTorch, Hugging Face Transformers, RESTful APIs

Tools & Platforms: Git, Linux, MySQL, AWS, PostgreSQL, Docker, Jira, VS Code, Postman, Overleaf

Concepts: Embedded Systems, Real-Time Systems, Computational Logic, Theory of Computation, REST APIs, CI/CD

PROJECTS

ResumeForge — AI-Powered Resume Tailoring & ATS Optimization Platform 2026

Python, Flask, SQLAlchemy, AWS Bedrock (Claude), REST APIs, Jinja2, JavaScript, LaTeX, HTML/CSS

- A 4-stage AI-driven pipeline for optimizing resumes based on analyzing job postings and automatically generating ATS-friendly resumes in LaTeX, PDF, and DOCX formats was devised (Flask, AWS Bedrock, Claude).
- A real-time application tracking system scoring tool in Python was designed with 7 weighted factors, giving immediate feedback on 20+ dimensions without relying on external APIs.
- An efficient multi-user architecture was constructed with session-based authentication and integrated application tracker having version control and score visualization features.

Skin Lesion Classification using Deep Learning Ensembles 2026

Python, PyTorch, Scikit-learn, DeepTune, df-analyze, HuggingFace (PEFT)

- 5 deep learning models were benchmarked using 3 fine-tuning methods on a 13K samples dataset of skin lesions (ISIC), obtaining 95.98% accuracy with Swin Transformer and 95.1% with BiomedCLIP PEFT.
- A multi-model voting classifier was developed by integrating embedding features from the top models with classical ML classification algorithms to yield an accuracy of 98.3% and AUROC of 0.999.

Automated Parking Assistance System 2025

C++, Arduino, Finite State Machine, SimulIDE

- A parking assistance controller using a finite state machine with hysteresis was designed and implemented in SimulIDE to filter out erroneous readings by the ultrasonic sensor.
- Implemented a non-blocking task scheduler in C++ that kept end-to-end sensor-to-output response time consistently under 10 ms.

EXPERIENCE

Senior Software Engineer Feb 2022 – Mar 2024

Capgemini – BMW XTECH Connected-Vehicle Platform Mumbai, India

- Led a group of more than 30 engineers in performing L2 operational duties for 3 microservices built using Spring Boot (Provisioning, App Repository, & SFA) for BMW's car platform in both the US and Europe, addressing 40+ incidents per month.
- Prepared SOPs for top 10+ incidents that recur, resulting in a reduction in L1-to-L2 escalations by about 50%.

Jr. Front-End Developer Jan 2021 – Nov 2021

Alian Software Anand, India

- Developed the frontend for 5 clients' web applications using Vue.js, Bootstrap 5, HTML, CSS, and JS.
- Integrated the frontend with backend RESTful APIs in collaboration with the backend developers in order to address any data contract mismatches prior to QA.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) In Progress – Expected Jun 2026

EDUCATION

Master of Applied Computer Science | GPA: 3.9/4.0 (88%) Sep 2024 – May 2026

St. Francis Xavier University Antigonish, NS, Canada

- Relevant Coursework: Theory of Computation, Computational Logic, Embedded Systems, Real-Time Systems, Machine Learning & Data Mining, Computer Network Security, Big Data

Bachelor of Technology, Computer Science and Engineering | CGPA: 8.9/10 (89%) Jul 2017 – May 2021

SRM Institute of Science and Technology Chennai, TN, India

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Object-Oriented Programming
