SUMMARY

Software Developer with 3+ years of experience designing and developing scalable web applications in IT services domains. Proficient in Core Java, Spring Boot, and modern JavaScript frameworks such as React.js and Angular. Skilled in building RESTful APIs, microservices architecture, and responsive frontends using Redux, Bootstrap, and Tailwind CSS. Hands-on experience with MySQL, MongoDB, and Redis for database and caching solutions. Adept in implementing secure authentication using JWT and Spring Security, and deploying CI/CD pipelines with Jenkins, Docker, and Kubernetes. Experience with agile methodologies, collaborating with cross-functional teams using Jira and Confluence to deliver high-quality, maintainable software solutions.

EDUCATION

New York University

Master of Science - Computer Science

September 2021 - May 2023

New York City, USA

SRM Institute of Science and Technology

Bachelor of Technology, Computer Science and Engineering

June 2017 - May 2021

Chennai, India

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Technologies: React.js, Redux, Angular, HTML, JSP, Bootstrap, Tailwind CSS

Backend and Frameworks: Spring Boot, Spring Security, J2EE, RESTful APIs, Microservices Architecture, Hibernate, JPA

Cloud: AWS, Azure

Database: MySQL, Oracle DB, MongoDB, Redis, JPA Repositories, CRUD Operations, Query Optimization

Agile and Collaboration Tools: Jira, Confluence, Agile Scrum, Sprint Planning, Code Reviews, Documentation, JUnit Testing

DevOps and CI/CD Tools: Jenkins, Docker, Kubernetes, Maven, Git

EXPERIENCE

Sattrix USA, LLC

Software Developer

July 2023 – Present

Michigan, USA

- Migrated legacy Java Struts application to Spring MVC, enhancing scalability and modernizing the codebase.
- Architected and optimized backend services for high throughput and low latency, ensuring seamless integration between microservices and RESTful APIs.
- Built and deployed CI/CD pipelines with Jenkins, Docker, and Kubernetes, enabling automated testing, containerization, and zero-downtime deployments.
- Implemented dynamic theming with React and Bootstrap, delivering customizable, responsive UI/UX designs.
- Secured application access using Spring Security and OAuth 2.0, developing role-based access controls.
- Integrated MongoDB and MySQL databases to efficiently manage structured and unstructured data to optimize it for enhanced data performance.
- Collaborated in Agile environments, contributing to sprint planning, peer code reviews, and technical documentation in Jira.

Dataworld Infotech Limited

Software Developer Intern

January 2021 – July 2021

Surat, India

- Designed and developed RESTful APIs and microservices using Core Java, Spring Boot, and Hibernate, enabling seamless communication between frontend modules and backend services.
- Created responsive and dynamic UI components using Angular, TypeScript, and Bootstrap, improving user interaction across internal project and client delivery modules.
- Integrated the application with MySQL and MongoDB for managing structured and semi-structured data, implementing JPA repositories for efficient data access.
- Developed and maintained CI/CD pipelines using Jenkins, Git, and Maven, automating build and deployment processes across staging and production environments.
- Implemented role-based authentication and authorization using Spring Security and JWT, ensuring data confidentiality and controlled access to sensitive project data.
- Collaborated with cross-functional teams using Agile Scrum methodology, conducted sprint planning, code reviews, and maintained tasks on JIRA and documentation on Confluence.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**
- **AWS Certified Associate Solutions Architect**
