SUMMARY

Applied Computer Science graduate student with over two years of professional experience as a software engineer enhancing and maintaining large-scale microservice architectures in enterprise-level production settings. Proficient in backend programming, distributed computing, cloud computing services, and intelligent application development using machine learning algorithms with extensive exposure to Spring Boot, Python, RESTful APIs, Amazon Web Services, and full stack development. As an engineer, passionate about solving practical technical problems in a systematic manner.

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, HTML5, CSS3, Angular

Frameworks & Libraries: Spring Boot, FastAPI, Vue.js, React, PyTorch, Hugging Face Transformers, RESTful APIs

Tools & Platforms: GitHub, Linux, MySQL, AWS, PostgreSQL, Docker, Jira, VS Code, Postman, Kubernetes

Concepts: Embedded Systems, Real-Time Systems, Computational Logic, Theory of Computation, REST APIs, CI/CD

PROJECTS

ResumeForge — AI-Powered Resume Tailoring & ATS Optimization Platform

2026

Python, Flask, SQLAlchemy, AWS Bedrock (Claude), REST APIs, Jinja2, JavaScript, LaTeX, HTML/CSS

- Designed and implemented 4-stage ML pipeline to customize resume in various file formats based on job description.
- Leveraged AWS Bedrock and Claude models to optimize resume generation and achieve fast response times.
- Implemented RESTful backend APIs and document generation pipelines.

Skin Lesion Classification using Deep Learning Ensembles

2026

Python, PyTorch, Scikit-learn, DeepTune, df-analyze, HuggingFace (PEFT)

- Conducted benchmarking of 5 neural network models using 3 training techniques on a 13K image dataset.
- Achieved a classification accuracy rate of 95.98% using Swin Transformer models and 95.1% using BiomedCLIP with PEFT.
- Evaluated accuracy, transferability, and performance of several models.

EXPERIENCE

Senior Software Engineer

Feb 2022 – Mar 2024

Capgemini – BMW XTECH Connected-Vehicle Platform

Mumbai, India

- Maintained 3 critical Spring Boot microservices (Provisioning, App Repository, & SFA) in the BMW connected-vehicle platform deployed across multiple production regions in the US and Europe.
- Managed production incidents related to APIs, service discovery, and provisioning workflows from multiple engineering teams including L1/L3 support teams and BMW engineers, resolving around 40 incidents per month.
- Performed RCA (Root Cause Analysis) on degraded services and worked towards minimizing such occurrences and improving response rates.
- Wrote SOPs, troubleshooting guides, and runbooks for recurring production problems including gateway timeouts, dependency issues, and provisioning errors.
- Worked with log, metric, and distributed-tracing monitoring tools to prevent breaches of service SLAs for availability of connected-vehicles services.
- Collaborated with distributed engineering teams in an agile production environment with a focus on reliability and fault tolerance.

Jr. Front-End Developer

Jan 2021 – Nov 2021

Alian Software

Anand, India

- Developed responsive UI interfaces of client applications in React Native, Vue.js, Bootstrap 5, JavaScript, HTML5, and CSS3.
- Linked frontend modules with REST APIs and coordinated backend work to ensure data contract consistency prior to QA testing.
- Developed Vue.js components to be reused in different projects and minimize duplication of frontend code.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

In Progress – Expected Jun 2026

EDUCATION

Master of Applied Computer Science | GPA: 3.9/4.0 (88%)

Sep 2024 – May 2026

St. Francis Xavier University

Antigonish, NS, Canada

- Relevant Coursework: Theory of Computation, Computational Logic, Embedded Systems, Real-Time Systems, Machine Learning & Data Mining, Computer Network Security, Big Data

Bachelor of Technology, Computer Science and Engineering | CGPA: 8.9/10 (89%)

Jul 2017 – May 2021

SRM Institute of Science and Technology

Chennai, TN, India

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Artificial Intelligence, Object-Oriented Programming
